ABSTRACT:

PURPOSE: To obtain a cosmetic for improving skin roughness.

CONSTITUTION: The characteristic of the cosmetic comprises containing secretory immunoglobulin A and lactoferrin. The secretory immunoglobulin A is contained in a mucosal secretory solution and plays an important role on biophylaxis in a local immune mechanism. The lactoferrin is a glucoprotein and takes iron ions from bacteria to exhibit an antibacterial effect. The preparation forms of the cosmetic include creams, lotions, emulsions, foundations, lip sticks, eye shadows, and hair liquids.
